PROFILE

Detail-oriented Information Technology Undergraduate (Year 2, Semester 2) at SLIIT. Passionate about software development and system architecture with a strong foundation in Object-Oriented Programming (Java) and Web Technologies. Proven ability to translate complex requirements into functional code through academic projects. Currently seeking a challenging internship to contribute to a professional development team while further honing industry-standard technical skills.

TECHNICAL SKILLS

- **Languages:** Java (Advanced), Python, JavaScript (ES6), SQL
- **Web Development:** HTML5, CSS3, Bootstrap, Basics of React.js & Node.js
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, VS Code, IntelliJ IDEA
- **Core Concepts:** OOP, Data Structures & Algorithms (DSA), REST APIs, SDLC

EDUCATION

BSc (Hons) in Information Technology |2024 - Present |**Sri Lanka Institute of Information Technology (SLIIT)**

G.C.E. Advanced Level Examination | 2022/2023

Taxila Central College, Horana

- Engineering Technology: **B**
- Science for Technology: **C**
- Information Technology: **C**

PROJECTS

Finance Tracker | Personal Project | Web Application ***Python, Flask, MongoDB, HTML, CSS***

Developed a full-stack Finance Tracker web application using Python, Flask, MongoDB, HTML, and CSS to manage income, expenses, budgets, and savings goals. Implemented secure user authentication and session

management to protect data, while integrating MongoDB for dynamic storage and complex CRUD operations. Designed a responsive UI and implemented RESTful routes to ensure smooth communication between front-end and back-end.

Golden Palm Hotel Reservation & Booking Management System |Group Project | Web Application ***Java, Spring Boot, MySQL, HTML, CSS***

Developed a full-stack Golden Palm Hotel Reservation & Booking Management System using Java, Spring Boot, MySQL, HTML, and CSS as a group project. Implemented secure user authentication with Role-Based Access Control to manage Admin and Customer functionalities, while designing dynamic room availability tracking with real-time updates. Integrated MySQL via Spring Data JPA for efficient CRUD operations and complex entity management, and built a modern, responsive interface for booking management, payment tracking, and administrative monitoring.

Joy Ride – Bike Rental & Ride-Sharing Platform | Group Project | Full-Stack Web Application ***Java, Spring Boot, MySQL, HTML, CSS***

Developed **Joy Ride**, a full-stack bike rental and ride-sharing platform using Java, Spring Boot, MySQL, HTML, and CSS as a group project. Implemented secure authentication with Role-Based Access Control for Admin, Owner, and User roles, along with a two-step bike owner registration process featuring image uploads and license verification. Built a payment management system with slip uploads, verification workflow, and admin approval, while designing a responsive UI and optimized backend APIs for seamless booking, payment tracking, and automated notifications.

SOFT SKILLS

- Problem-Solving | Analytical Mindset
- Team Collaboration | Agile Methodology
- Quick Learner | Technical Adaptability
- Time Management | Project Planning
- Effective Communication
